Translation Company TranScript Ltd.
General Director

To Whom it may concern

Date: September 15th, 2009

ENERGOTECH Company is a well-known provider of integrated solutions in the field of small-scale power engineering for a broad spectrum of clients and application areas. We perform the entire complex of works on "turn-key" design of engineering and information systems: client's consulting, designing, equipment delivery on site, construction, installation and commissioning works, guarantee and post-guarantee servicing, client's personnel training. Energotech Company is an official distributor for Waukesha and Cummins in Russian Federation.

Our business activity implies very strict requirements to the technical documentation being translated and project timing. We found Translation Company TRANSCRIPT Ltd as being a reliable partner in the field of translation and technical documentation preparation.

It is a pleasure to work with TranScript Ltd due to their high quality of job accomplishments, expertise, commitment to the time schedule and flexibility. We also fully satisfied with TranScript's team availability and ability to respond to urgent requests in the shortest time.

We will continue our cooperation and sincerely recommend to use TranScript services.

Best regards,

Energotech
